COVER LETTER

Respected Sir/Madam,

I am writing to you regarding the Software Developer position that has recently opened up in your company. I applying for this position and I believed that I meet the majority of the required qualifications and skills for this position. I graduated with Distinction in Mechanical Engineering from Savitribai Phule Pune University.

Four years in the engineering has not only taught me the basics of mechanical studies but also has given me the ability of reasoning things. It given me the ability to think beyond the established facts. and that's why I sharpened towards a technology. more over I am getting explore the IT fields and getting passionate especially about the web.

To get a greater understanding of the technological aspects Currently, I am doing a Full Stack Web Development Course from EDYODA Software training institute Bengaluru. It helped me learn about the type of roles and responsibilities and the work ethics that need to be followed.

I also have taken up courses such as Complete web developer Course 2.0 with Infosys Springboard as well as TCS iON Career Edge - Young Professionals. that taught me valuable skills. In the future, I plan to complete (Spring Boot, AWS and Java Backend Development) for better understanding about the field of web development.

My resume mentions the full extent of my career growth. I hope you will take a look at it and give me a call soon.

Looking forward to hearing from you.

Sincerely
Aditya Sunil Wakale
